

MMPRO

GAMING MOUSE

User Guide

The MMPRO is an ambidextrous RGB Chroma gaming mouse with ultra-light structure and 4 removable side buttons for full professional customization from 0 to 4 side buttons.

It has 9 programmable buttons that can be customized by a powerful software with macro creation, light customization and performance settings.

1. DPI profiles: Tap this button to switch between 6 different preset DPI levels
2. Polling rate: Tap to switch between 125-250-500-1000Hz

Download our software from www.marsgaming.eu and check our website for further information about the MMPRO
